Professional Experience

Project in Data Analytics

- Wrote a credit card application using python programming.

Jacksonville, FL

February 2022

Project in Web Systems Development

- Built a website with a team of four. Helped with HTML code and made content for the website.

Jacksonville, FL

October – December 2021

Project in Computer Forensics

- Wrote a computer forensics report for a simulated case.
- Noted by Professor for doing very well on it.
- Report took three days to make: one day to setup Autopsy, one day for data collection, and one day to assemble the report.

Jacksonville, FL

December 2020

Project in Computer Forensics

- Did a Photo Story assignment which entailed taking three pictures at the University. The first one was taken at one of the university's parking lot. The second one was taken at the entrance of the University's Starbucks. The third one was taken in front of the elevator inside my university's library and each picture had to have a unique identifier that belonged to the picture taker.

Jacksonville, FL

October 2020

Project in Computer Forensics: Made Graphic User Interface “GUI”

- Used Java and Java Effects to create a GUI Application that displays a digital clock that can convert the time displayed on the digital clock from standard to military time and vice-versa. Furthermore, the color of the clock can be changed to red when the up key is clicked, cyan when the down key is clicked, and black when the enter key is clicked.

Jacksonville, FL

November 2019

Project in Computer Forensics

- Made a bootable forensic disk in computer forensics.

Jacksonville, FL

August 2020

Project in Computer Networks

- Wrote a paper review about an article on network neutrality.

Jacksonville, FL

April 2020

- Additional Skills: Microsoft Office Suite Proficiency, Intermediate Java programming skills, Beginner Python programming skills, Boy Scouts of America (Eagle Rank)
